# Blues, Weakfish, Sea Bass and Croakers Now Migrating Southward; Shiny Squid Proves Irresistible Lure

## JIGGING FOR BLUES IN BARNEGAT BAY

Shiny Squid Attractive; Fish Eager for Moving Object That Looks Like Food.

INLET MEETING GROUND

Season for Duck, Goose and Brant Now Open in New Jersey.

By W. H. BALLOU.

FORKED RIVER, N. J., Oct. 15-Don't get excited. That man waving his up and down in the small boat is not signalling and is not in danger. He is merely figging for fish. No need for you to put on extra power and speed up your craft to save his life. Better anchor alongside of him and do a little ligging yourself.

It is the swift way to catch 'em at this season of the year in the Inlet of Barnegat bay, close to the tall lighthouse, which the public and space writers (at so much per) believe is soon to to the public over the public of the public

to topple over, but which myself and other engineers know will be standing there for a century hence, in spite of all the oceanid waves of the Atlantic. Its rotund base of 55 feet of solid ma-sonry below the surface will hold it against wind and sea.

Out of old Barnegat daily goes a fleet of little sneak boxes and larger craft to the Inlet to jig for fish for the markets. It's the simplest known process of catching the fluny ones in indefinite according to process of catching the finny ones in indefinite numbers, species and sizes. The Jig comprises a small bluefish squid of lead, daily scraped with a knife to make it shiny, and attached to a few feet of stoutest bluefish line. You work one in each hand on opposite sides of the boat. Its weight carries the its suffix down into water and ries the jig swiftly down into water and you jerk it out swiftly to attract vic-

### Various Species by Jigging.

Carnivorous fish cannot stand a moving object that looks like food. They noust grab it. So, in the wild process of waving the arms up and down, the figger is constantly yanking into the boat whatever is hooked, bluefish, weakfish, sea bass, croakers, &c. The Inlet at this season of the year is the com-mon meeting ground of these and other species, so our commercial friend seizes

Curiosity led me to drop kedge and try my luck in the common lottery, not for pay but just for instance—and the full fish-box. Matters went buildy until my unaccustomed arms kicked. I soon had enough of such hard work, when I wanted more play, and besides

it was too easy to catch 'em.

Next, I dropped over on the edge of the rollers, breaking in magnificent surf along the shoals. Here, instead of jigging, I attached the squid to my dishline and cast over in the surf, Reeling in as fast as possible I begind fishline and cast over in the surf. Reeifishline and cast over in the

ing out their haunts, fighting with them and getting some of them in the row-sembly, giving you permission to kill boat. So, I drifted inward with the elk which come down into your commencing flood tide, dragging baited hooks until one took hold. He was some the commencing flood tide, dragging baited hooks until one took hold. He was some hummer alright and fought for eleven ter." minutes to distodge the hook.

water was too deep, and the hazards at hand too few, for him to break the tackle and he finally came aboard grunting his peculiar grunt, which he kept grunting for a long time in the fishbox. As soon as he was the fishbox. As soon as he was ocked, I had tossed the kedge overboard, knowing that he had companions

I got those companions, or at least, some of them, and got them by the old-time method we love and live for. And who would slave for a Rockefeller fortune when he could just as well struggle with large and husky weakfieh?
September has been the angler's ideal

month. Most of the days were warm, dry and cloudless. September is really the third and last month of summer, which really commences July J, since the sun does not until then get fairly turned back from its northern journey. nor do the days really begin to shorten until about the first of October. Crowds of anglers on the water grad-

unly reduce after Labor Day, but gun-ners take 'h ir places, continuing the possible, I should say that more

and larger fish have been taken this september than during the prior two The forest land contains good trout souths. Certainly, as many anglers streams, and it is understood that members in autos, stayed as long and got bers of the club will install a fish less warm, more rainy and generally bleaker, but it is a safe bet that the and take bait or squid as greedily as

en the great Barnegat Bay and the ro-mance is there, even if no sail whitens the horizon line and the plunk, plunk of the motorboat is but little heard. If the fish won't take the hook in the deep holes of the hay or channels, they will at the inlet and on the ocean front.

along the whole Jersey coast, so that anand gunner may be comfortably d for. The duck, goose and brant son be ran last Thursday. The angler as the best of it, since the gunner must wn and get his stand before the first streaks of day in order to get the birds. Your angler can lay abed, rise when he chooses, fish when he pleases and gen-

traily put it all over the gunner.
It is safest for anglers to bring balt with them hereafter. However, I have ned to net my own bait and also to on his farm which had twenty-one rat-pers, swiping soft, shedding, buckling, ling and hard crabs out of the sea chage patches. Here is not only all that you want but lots of food be-

these poling expeditions I often note fish inshore feeding in They also like the vastages of crabs mentioned. It is work of an instant to hit hook and for them, sometimes with a float e and a half above the hook and times merly casting out on the bot-slowly reeling in the balt. And all theon in two feet of water.

Big Striped and Channel Bass Taken Off the Jersey Coast.

ROBERT W. JOSEPHSON and 43'2 POUND STRIPED BASS TAKEN BY AVON. THIS FISH WAS 50 INCHES LONG and HAD A GIRTH of 26'2 INCHES.

### FISH NOT PARTIAL TO HIGH PRICED WORMS Cost Makes No Difference

When in Biting Mood. were boosted this season from 15 to 35 cents a hundred. Crickets. formerly selling for 35 cents a hundred, had been sold for 10 cents a dozen. Muncie, Ind., Oct. 18.-Angleworms

Lake fisherman has sold this season 20,000 worms. He is said to have dug his worms early in the spring and placed them in a coffee grounds bed, and as a result of frequent watering and feeding the worms multiplied.

Angiers assert that blue still season. Anglers assert that blue gill sunfish do not bite any better on 35 cent worms than on the 15 cent kind, and the same is true of black bass and crickets.

out of water. The one that Got Away.

## Doings of Local Anglers With Rod, Reel and Line

The wise old follower of Isaak Walton Jersey anglers during the last few weeks of a "rainy season" will be a welcome visitor, but aside from that, the experienced fishermen know that the fall is the best time for hooking "the big fellows." As a usual thing, the fish also have more "pep" and fight than when weather and water are warmer.

The New Jersey meason for bass and pike continues through November and the present prospect is that thousands of "ligging" as it is called."

And Bill Cobb of the M. J. R. III. use that they are so successful in catching fish at the geep sea banks. Mr. Snyder also asked where the balt could be obtained.

"There is no need to go to expense in purchasing batt for hake, whiting and they split, using the flesh part for balt, cutting it into generous strips. The real secret, however, is to keep a moving line, lightly as it is called."

show it.

The in truth you could do it with pride
Why one with a half eye might know it
By the hang of your creel at your side

When a turn in the course there re-Where the shadows lay darkening and And the arms of a spruce half con-The wide, lazy swirl of a pool.

Ah! perchance you again stand before it. And again feel your pulses that t As you carefully cast your flies o'er With throbbings that would not be

And just where the rippies were curving. In wide circles right over his isir.

Then, 'neath the deep bank they went swerving,

Tou cast—and it happened right there.

Can you ever forget it I wonder, The dash and the splash of that "rise." How he came like an arrow from under, And snapp'd at the last of your files?

Do you not hear your reel still singing.
As it sang that June day in your ears?
Will the sound of its song lose its ringing.
Or the music be lost with the years? water to the shallow weed beds in And your red can you not see it bending.

And your red can you not see it bending.

And your line going up gainst the stream?

And the fight that he made, and the endine.

log. Does it not all come back like a dream? Yes, you had nin, I know, and you play'd

With all of a fisherman's skill.
Till at hast, thed out, you had laid him
Full length on the top of a rill. Then near and yet nearer you reel'd him, And now you reached down with your net, Not even an inch would you yield him. Tou thought you had him play a—and yet

Just as you placed your not under.
With a strength that was born of despair,
plunged, and was gone, and I worster
Did you cry or just stand there—and
swear? Well, at least you went home heavy hearted.
And you showed up your luck for the day.
And you told—I can see your hands parted.
Of the one that, alast got away.

And next day with the "circle" about you While they sympathized each on his part Year hands-Forgive if I doubt you! Were just a bit wider apart. Till at last in each afterward telling.
That fish grew so large in the tale,
May I sait—pray parden my spelling!
Was it trout that you lost or a whale!

Inexpensive Bait.

"In THE SUN the other day," writes ili not put away his rod and line with James Lee of 163 Tenth avenue, "Joe the coming of the first frost. In fact, James Lee of 163 Tenth avenue, "Joe any touch of frost that will kill off the Snyder asked what kind of bait 'Shorty' swarms of mosquitoes that have pestered and Bill Cobb of the M. J. R. III. use

# FISHING FOR CARP

Avoid Casting Shadow on Waters.

BITE BEST IN SUMMER

Worms, Grubs, Grasshoppers and Pieces of Fresh Meat Good Baits.

By W. C. KENDALL.

U. S. Bureau of Fisheries. fish for carp you must put on a very large measure of patience" still holds good, for it is a very wary fish, and when fishing in clear water every precaution to avoid casting a shadow or being seen must be observed. It is said to be useless to fish from a boat. Carp bite best in warm or hot weather.

Probably no better baits for carp than those prescribed by the "Compleat An-gler", or some modifications of them can be employed, "Advance baiting" is also be employed. "Advance batting is also advocated by old anglers. This consists of placing in the water some six breight feet from the shore pieces of bolled potatoes or other cooked vegetable matter, such as kitchen waste, for table matter, such as kitchen waste, for several successive days before fishing. Then, if possible, a day or two before fishing deposit a small quantity of the same material that is to be used for

Various baits have been recommended. Worms, grubs, grasshoppers and pieces of fresh meat have been successfully used, but the most highly recommended befts are composite pastes. A tough paste may be made of moistened bran, wheat or other flour thoroughly mixed with a little sugar or preferably honey. To give the paste a greater tenacity cotton batting or wool should be

attreed in.

Ground or mashed white meat, such as veal or pork, or any bleached meat may be added, but this bait must be fresh and kept untainted. Pellets of partly belled potatoes are said to be good bait as well as dough balls or corn kernels wrapped in meaquito bar.

later make a seine haul over the baited grounds to capture the carp which con-gregate to feed there.

In summer months, when the water is

the blackfish grinding the hard bait.

Raise the line very slowly and when up so as to be taken easily will suffice the blackfish takes hold strike sharply and keep the fish coming. The results will be amazing."

By almost any grain or vegetables cut up so as to be taken easily will suffice the blackfish takes hold strike sharply as beit, and any amount from a few handfuls to half a peck or more should be used, according to conditions. The will be amazing.

### UNCLE SAM ASKED FOR FISHERIES SHIP Vessel Urged to Be Put on St.

Lawrence to Distribute Fish.

ALEXANDRIA BAY, N. Y., Oct. 18 .- An effort is being made, to improve fishing conditions in the St Lawrence River, and the United States Bureau of Fisher-ies is asked for a safe and suitable ves-sel to carry the 200,000,000 fish annually propagated by the hatchery at Cape Vincent to where temperature and feed-ing conditions are more suitable.

Charles W. Rogers of Rochester, N. Y., ent committee in 1907, and needed many small gasolene vessels that have on the beach, to compose something will rust out in some port if some good the celebration, then only a day or use is not made of them.
